## Rubb knows the drill when it comes to maintenance and storage facilities

### Rubb Buildings Ltd provided the ideal solution to protect the inspection, maintenance and refurbishment of oil and gas sector equipment in Scotland.

Aberdeen based CairnToul Well Equipment Services provides sustainable and cost effective well equipment maintenance solutions to the oil and gas industry. The company's workshop services handle the onshore inspection, refurbishment and certification of wellheads and other equipment as well as a warehousing and stock management.

Rubb Buildings Ltd delivered a custom designed workshop structure to Portlethen, Scotland to house the refurbishment processes undertaken by CairnToul. The BVR maintenance and storage building features a span of 15m and is 22m long, with low sidewalls of 3m. The structure incorporates multiple side entrances and openings to accommodate space for existing equipment racks and access to and from the building.

The front gable includes a 14.75m high opening, while one side opening measures 3.7m wide x 2m high to facilitate entry and exit of well equipment. The opposite side includes two further openings measuring 2.7m wide x 2.48 high and 3.7m wide x 1.5m high. Two access doors complete the facility.

Technical Sales Engineer Ian Mackley said: "The structure has a galvanized steel frame, blue PVC coated fabric walls and a white translucent PVC roof to let the natural light in. We were requested to supply the 3m low leg to blend in with site constraints."

#### Notes to Editors

##### About Rubb Buildings Ltd

Rubb Buildings Ltd is a world leader in the design and manufacture of custom made relocatable engineered fabric structures.

Highlights include ground-breaking military buildings (aircraft hangars, shelters, storage facilities), specialist sports buildings and structures for a variety of sectors including aviation, ports, construction, bulk storage and environmental (waste and recycling).

All products are designed and manufactured at Rubb's UK plant at the Team Valley Trading Estate in Gateshead, Tyne and Wear. The company was founded in 1977 and has a proud history of delivering innovative and quality structures to a wide range of clients.

The Rubb Group has plants in the USA, Norway, Poland and China.
