Case Study: Paignton Community and Sports College

RUBB Buildings completed a multi sports hub facility for Paignton Community and Sports College. The 42m x 69m BVE sports building, with 7.5m sidewalls, caters for a variety of sports and has an interchangeable layout.

Special features include steel clad sidewalls for added security, sidewall gutters for surface water drainage, a ventilation system which provides three-and-a-half air changes per hour, and an internal lift shaft accessible via a bridge from the car park.
